

FANSYNC

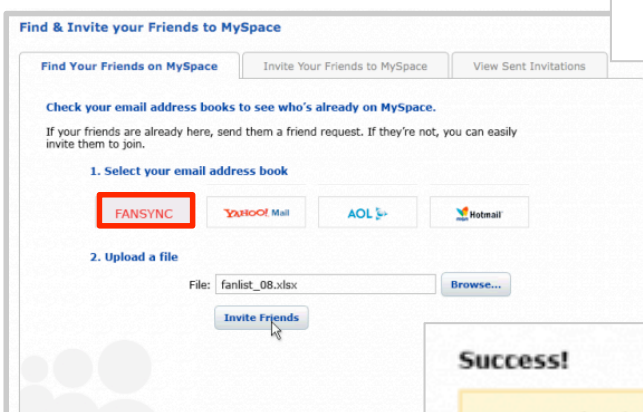

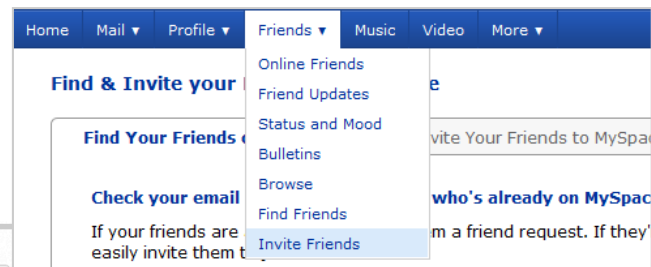

Introducing FANSYNC Exclusively for MySpace Bands

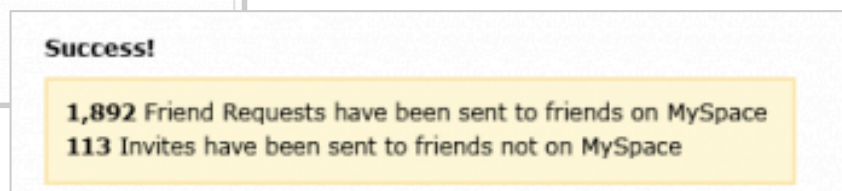

FanSync is a bulk uploader which allows bands with more than 500 friends to upload a .CSV file with up to 25,000 records in just a few clicks.

This exclusive new tool will enable you to sink your Artist's fan databases with their MySpace profile, instantly finding your Artist's fans all over MySpace with the option to invite those who aren't MySpace users to join.

Once logged in, simply go to Invite Friends from the Friends menu in the nav bar...

... click on FANSYNC, browse for your fan database CSV file, then click to Invite Friends.

Keep your artists' entire fan database up to date with latest tracks, gigs & news through MySpace

FANSYNC

Benefits

- Instantly grow Artist MySpace pages by easily finding your fans already on MySpace and inviting those on your lists to join
- Wider exposure in MySpace through proven and core fans
- Easily communicate with fan bases with MySpace Tools
 - Bulletin, Post, Blogs Songs
 - Promote Tours
 - Faster than email
- Sink up your website email data with your artists' MySpace
- Manage your street teams or local promoters through MySpace
 - Upload your street team database and create a private community
 - Easy to use community management tools

FANSYNC is available to artists only

MySpace uses the emails in the .csv file that you upload only to help you find your fans on MySpace and invite others from your fanbase to join the site on your behalf. MySpace will never spam, rent or sell any email addresses in the database that you upload. You may not use this uploader for any purpose except inviting people you know to join MySpace
